

TODAY'S WASTE, TOMORROW MATERIAL!

Circular Economy in Construction

Conference Venue

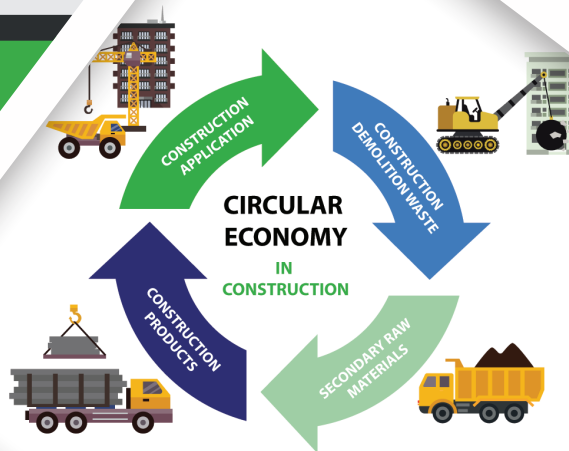

Stadthalle Wels,
Pollheimerstrasse 1, A-4600
Wels, Austria

Date

28th February 2019 afternoon
session (3 hours)

Organized by

projects RE4, VEEP, INNOWEE,
GREENINSTRUCT, FISSAC

Workshop is organized within the World Sustainable Energy Days, session "Innovation Workshops Energy and Buildings"

Five H2020 research and innovation projects are pleased to invite researchers, industrial companies, professionals and wide public interested in the topic of circular economy for the common workshop called **"Today's waste, tomorrow material"**. Projects representatives will introduce their results and lead interactive discussions related to the topic. The event will be held in English.

Workshop registration is free of charge, but it is necessary to be registered on the WSED conference in order to participate in the workshop.

Workshop registration for free: <https://www.eventbrite.co.uk/e/today-s-waste-tomorrow-material-circular-economy-in-construction-tickets-52040958909>

Registration for **WSED**

Contact person: Petra Colantonio,
petra.colantonio@fenixnt.cz

The projects have received funding from the European Union's Horizon 2020 research and innovation programme.

14:00 - 14:05	Event opening and welcome	Barbora Blaskovicova , FENIX TNT, Czech Republic
---------------	---------------------------	---

Projects introduction

14:05 – 14:15	RE4 - Reuse and recycling of CDW materials and structures in energy efficient prefabricated elements	Alessandro Largo , CETMA, Italy
---------------	---	--

14:15 – 14:25	VEEP - Cost effective recycling of CDW in high added value energy efficient prefabricated concrete components	Anna Paraboschi , RINA Consulting, Italy
---------------	--	---

14:25 – 14:35	GREENINSTRUCT – Prefabrication for refurbishment from a modular perspective by way of a universal building block with customization potential	Xiangming Zhou / Gediminas Kastiukas , Brunel University London, UK
---------------	--	--

14:35 – 14:45	INNOWEE - Development of new economically viable, flexible and modular solutions able to process high amounts of CDW waste and reaching at the same time a high performance in terms of energy efficiency and environmental impact	Adriana Bernardi , CNR-ISAC, Italy
---------------	---	---

14:45 – 14:55	FISSAC – Fostering industrial symbiosis for a sustainable resource intensive industry across the extended construction value chain	Blanca Juez Sanchez , ACCIONA Construcción, Spain
---------------	---	--

14:55 – 15:15 Coffee break

Interactive poster sessions

15:15 – 15:30	RE4 project	Michael Scullin , CDE Global, UK
---------------	-------------	---

15:30 – 15:45	VEEP project	Anna Paraboschi , RINA Consulting, Italy
---------------	--------------	---

15:45 – 16:00	GREENINSTRUCT project	Ines Kantauer , ALCHEMIA-NOVA, Austria
---------------	-----------------------	---

16:00 – 16:15	INNOWEE project	Vilma Ducman , ZAG, Slovenia
---------------	-----------------	-------------------------------------

16:15 – 16:30	FISSAC project	Blanca Juez Sanchez , ACCIONA Construcción, Spain
---------------	----------------	--

16:35 – 16:55 Panel discussion with speakers

16:55 – 17:00	Event closure	Barbora Blaskovicova , FENIX TNT, Czech Republic
---------------	---------------	---
